For example : jonsnow-1-PC, jonsnow-2-PC
etc.

Provide your credentials of active directory directory mailed to you

Windows Security

Computer Name/Domain Changes

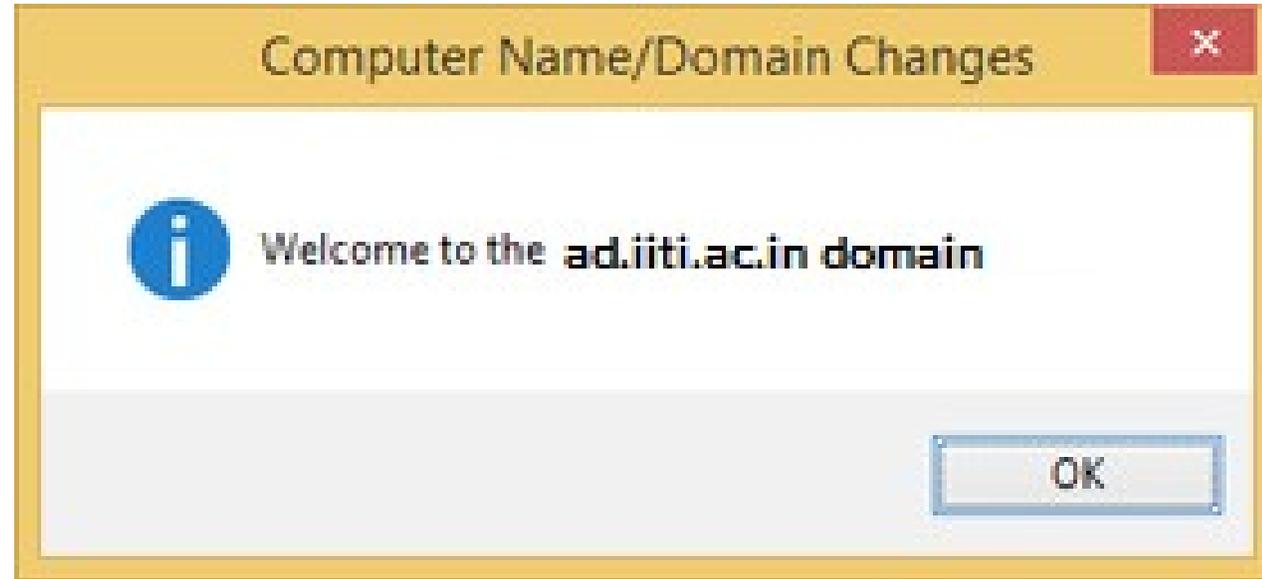

Enter the name and password of an account with permission to join the domain.

Domain: **ad.iiti.ac.in**

OK Cancel

The image shows a Windows Security dialog box titled "Windows Security" with a close button in the top right corner. The main heading is "Computer Name/Domain Changes" in blue. Below it, the text reads "Enter the name and password of an account with permission to join the domain." There is a light blue rectangular area containing a user icon on the left and two input fields on the right. The top input field is labeled "Your Username" and the bottom one is a password field with ten asterisks. A red rectangular box highlights both input fields. Below the input fields, the text "Domain: ad.iiti.ac.in" is displayed. At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

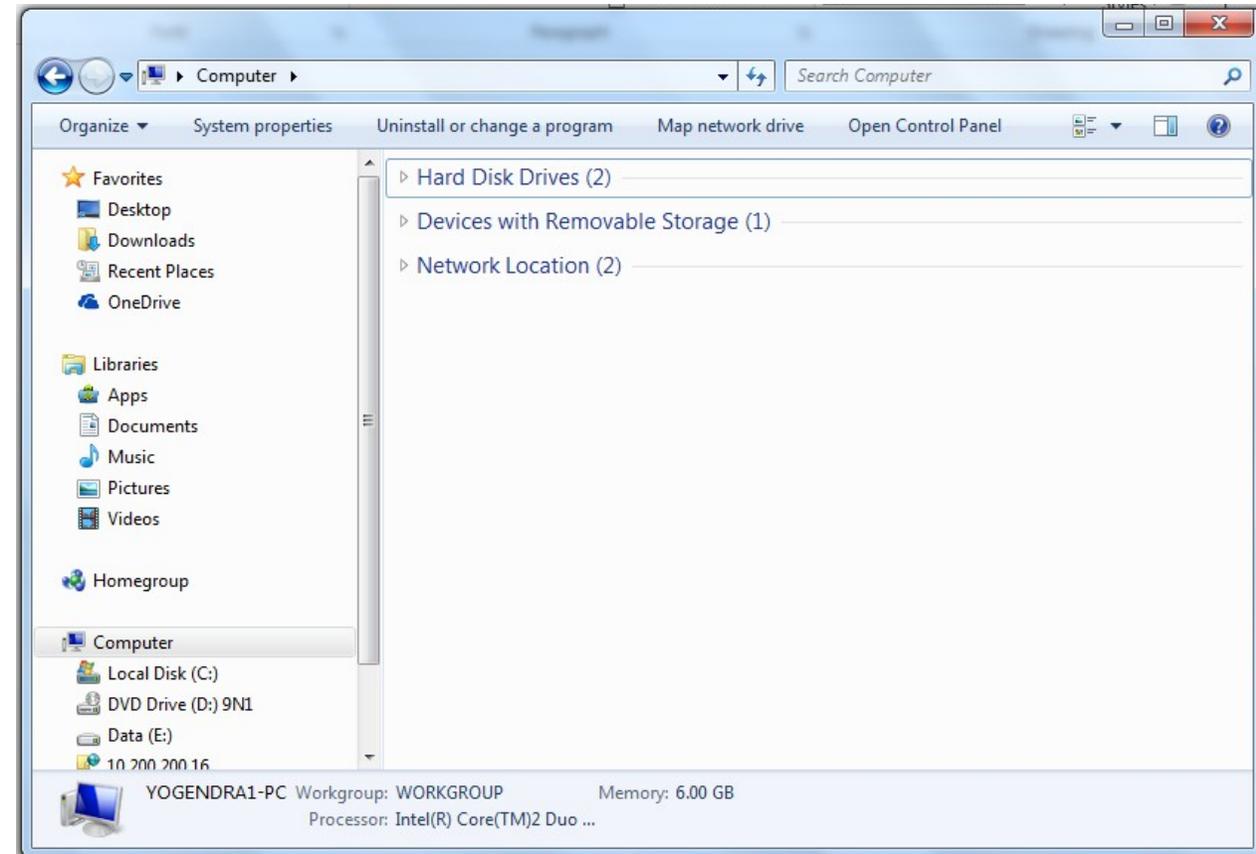

A welcome message will appear
after successful login

- After adding the computer into Active directory domain it will ask you to reboot the machine.
- Please save your work and reboot the machine.
- At the login window now please type you new active directory username (e.g. jonsnow@iiti.ac.in) and password for logging.
- You can also use your old (Admin) computer username and password as well by : `.\YOUR_OLD_USERNAME` and your password of that account. *(please note a “dot slash” is required before username)*
- For any installation of software and admin task in your computer you can specify: `.\YOUR_OLD_USERNAME` and the password.

After adding your computer to Active directory domain

1. Open my Computer or File explorer.
2. Type `\\equitrac` on the top of address bar.
3. It will show you the printers available in the campus, double click on the relevant printer to install.
4. **When you start installing printers it will ask for user name and password. Please provide administrator user name of your machine as described in the slide no. 10 step 3.**
